

**5<sup>TH</sup> GRADE  
SUPERHERO NEWS  
KERR ELEMENTARY**

**Ashley's Annotations**

Our author celebration is wrapping up. Wow! What a great job they did! There were so many great author presentations, we couldn't pick just one.

I hope every kiddo has been inspired to continue to read their author's works, or I hope they have been inspired to read new authors this summer! 😊

**Laurence's Link**

The school year is winding down and so is our last unit. Next week we will continue with our research on the history of science. Many students have identified areas of science they are interested in and found great role models in these areas. I have been so impressed with all the hard work they have put into their projects and the interesting facts they have found!

**King's Korner**

It's hard to believe we're wrapping up the year. The students had a great time with the Vacation Project. We will finish up this week with the vacation project presentations. The students always love showing off their amazing work!

**Vaughan's Voice**

Next week in writing the students will continue publishing one of their stories. Look for these to come home--they are cute and clever with sections "About the Author" and illustrations. Please encourage your kids to type over the summer.

**Have you heard  
the news!**

**Please take a moment  
to read our goodbye  
messages on the  
reminder pages. 😊**

**Summer  
Time!**

**24 SCHOLARSHIPS AVAILABLE  
TO PROVIDE THIS CAMP FOR FREE  
TO FEMALE STUDENTS IN GRADES 6-8  
REGISTRATION IS FIRST COME, FIRST SERVE**

This program is fully funded by  
The Texas Workforce Commission

## June 25<sup>th</sup>—27<sup>th</sup>, 8 am – 12 pm

Trenton High School      2289 FM 815, Trenton, TX 75490

This camp will use Texas Instruments' rover and graphing calculators to provide girls with an exciting experience in learning the basics of programming for robotics.

The curriculum includes learning to code and it reinforces the required state proficiency with graphing calculators. Students will be introduced to the basics of mechanical engineering and circuitry which supplement the overall BEST Robotics program currently being provided to Texas schools.

Participants are not required to be from BEST program schools.
